

MOLD

GROWTH, ASSESSMENT, REMEDIATION

*It Has Been
Estimated That
40 Percent of Homes
And Facilities Have Some
Form of Mold*

It Has Been Estimated That 40 Percent Of Homes And Facilities Have Some Form Of Mold.

Concern about indoor exposure to Mold has been increasing as the public becomes aware that exposure to mold can cause a variety of health affects and symptoms, including but not limited to allergic reactions. Since Mold requires moisture to grow, it is important to prevent moisture problems in buildings. Moisture problems can have many causes, including uncontrolled humidity in unoccupied homes, construction defects, roof leaks, plumbing and HVAC defects and delayed maintenance.

Indoor Mold may not be obvious. It is possible that mold may be growing on hidden surfaces, such as the backside of drywall, inside wall cavities, insulation or the underside of carpet and pad. Once mold growth begins, it amplifies quickly devouring everything in its path and using the item it is growing on as a food source. You should expect hidden mold if a structure has a "Earthy or Musty" Odor. If you suspect that you have a Mold Problem, contact **Volusia-Flagler Water & Fire Restoration, Inc.**, and we will suggest remedies to eliminate or control the moisture that caused the Mold and establish a protocol for removing the Mold. We have the proper Insurance, IICRC credentials and experience needed to handle **Mold Remediation** losses.

Simply killing the Mold with a biocide or bleach IS NOT enough, the Mold must be physically removed. Specialized High Efficiency Particulate Air Filtered vacuums are used, along with damp wiping the surfaces with water and special antimicrobial cleaning agents. Air-filtration devices are used to recirculate and clean the air. Significant mold growth may require Soda Blasting. Upon completion of the project, air-quality sampling (testing) will be conducted, to insure the structure has been returned to normal microbial conditions. You can be sure that when you choose **Volusia-Flagler Water & Fire Restoration, Inc.**, for your mold remediation needs, you are receiving the most professional and reliable services at a fair price. **Volusia-Flagler Water & Fire Restoration, Inc.** is the name you can **TRUST** for your home or business.
